

3. Excursion and Local Field Visit

Since 2013, the Department of Geography at Dinhata College has organized excursions at both local and national levels, focusing on a wide range of geographical, social, and environmental aspects. These excursions have been instrumental in exposing students to diverse landscapes and ecosystems, from nearby regions to distant national destinations, giving them a comprehensive view of India's geographical diversity. The excursions not only provide hands-on experience in fieldwork but also engage students in understanding socio-environmental dynamics, such as how communities interact with their environment and adapt to various challenges. These field trips have explored a variety of topics, including local landforms, water bodies, ecosystems, human settlements, and the impact of environmental changes on society. By traveling to different regions, the students gain insight into geographical variations and their socio-cultural and environmental contexts. This blend of theoretical knowledge and practical exposure has become a hallmark of the department's educational approach, fostering a deeper understanding of geography's real-world applications.

4. Nature Camp-

On February 10, 2024, a Nature Camp and Local Field Visit was organized for MDC and SEC students at Kampteswar Gar, Dinhata. A total of 220 students participated, guided by Dr. Bappa Sarkar, Assistant Professor of Geography at Dinhata College, along with Pallab Roy, Tanmoy Saha, Bishnu Barman, and lab attendant Subhra Mukherjee. The visit aimed to provide students with hands-on experience in understanding the local geography, biodiversity, and historical

significance of Kampteswar Gar. Throughout the day, students engaged in various activities, including field observations, data collection on local flora and fauna, and discussions about environmental sustainability. The supervisors facilitated interactive sessions, ensuring that the students comprehended the geographical features of the area. The camp concluded with a reflection session, where students shared their insights and experiences, emphasizing the importance of field-based learning. The visit was a valuable educational experience, enhancing the students' understanding of natural environments and their practical application in geography.

5. Celebration and Observation

The Department of Geography at Dinhata College celebrates important environmental days every year, including **World Environment Day** and **World Water Day**, among others. These celebrations aim to raise awareness about environmental issues, sustainable practices, and the importance of water conservation among students and the local community. Various activities such as seminars, workshops, tree plantation drives, and student-led presentations are organized to mark these occasions, fostering a sense of environmental responsibility and engagement with global sustainability goals.

World Environment Day, 2024

In 2024, the Department of Geography at Dinhata College celebrated World Environment Day with the active participation of 60 students. They marked the occasion by planting trees in their localities, promoting environmental conservation and raising awareness about the importance of sustainable living.

Seed Planting
Date-16/01/2024

During the local river origin identification and landform study, students engaged in seed planting near the Bania Daha riverside. This activity not only contributed to local environmental conservation but also provided practical experience in ecological restoration, enhancing their understanding of riverine ecosystems and landform dynamics.

Date- 5/9/2023

The Department of Geography, Dinahata College, celebrated Teacher's Day 2023 by organizing a tree plantation drive. Faculty members and students participated in planting saplings around the campus, promoting environmental awareness and sustainability. This initiative reinforced the department's commitment to fostering eco-friendly practices and honoring teachers through meaningful actions.

Date- 31/05/2023

During the farewell ceremony organized by the Department of Geography, Dinhata College, a tree plantation drive was conducted to mark the occasion. Students and faculty members participated in planting saplings, symbolizing growth and new beginnings. This initiative highlighted the department's commitment to environmental conservation and left a lasting, positive impact.

Date- 18/11/2022

During the farewell ceremony of 6th-semester students, the Department of Geography, Dinhata College, organized a Banyan tree plantation drive. Faculty and students participated in planting the sapling, symbolizing strength and longevity. This initiative not only marked the students' departure but also promoted environmental sustainability.

<p>and left a lasting legacy on campus.</p>	
<p>Date- 20/7/2022</p> <p>A tree plantation drive was organized by the Department of Geography, Dinhata College, in collaboration with the Principal, Abdul Awal. Faculty members and students enthusiastically participated in planting saplings around the campus. The initiative emphasized environmental responsibility and the importance of greening the campus, with the Principal actively supporting the cause.</p>	

6. Students of the Year-

On May 24, 2024, the Department of Geography held its annual Students of the Year Ceremony to honor outstanding academic performance and contributions. The award for this year was presented to Biki Choudhury, a student from the 4th semester. Biki Choudhury received the accolade in recognition of exceptional academic achievement, dedication to geographical studies, and active participation in departmental activities. Biki's impressive performance in workshops, National seminars, and contributions to class discussions set a high standard for peers. The event was attended by faculty members, students, and guests, who celebrated Biki's accomplishments. The ceremony included a brief address from the head of the Geography Department, who commended Biki for their hard work and dedication.

Departmental Special Award, 2022

Rahul Debnath, a student from the Department of Geography, Dinhata College, was felicitated today for securing 1st Class 1st in CBPBU, 2021. The department celebrated his outstanding academic achievement with pride. Faculty and students congratulated him, recognizing his hard work and dedication, and wished him success in future endeavors.

7. Publication of Documentary Film

The Department of Geography at Dinhata College has published a documentary film that highlights the department's field visits, excursions, and local landform identification activities. This film serves as a visual documentation of the diverse geographical features and landscapes explored by students and faculty during their excursions. Focusing on the practical application of geographical theories, the documentary captures key aspects of physical geography, including the identification of local landforms such as rivers, hills, plains, and plateaus. It also features interviews with students and faculty, sharing their insights and experiences gained during these educational trips. The documentary is a testament to the department's emphasis on experiential learning, where students actively engage with their environment, developing a deeper understanding of geographical phenomena. Additionally, it aims to inspire the academic

community and local population to appreciate the region's natural features and promote geographical education through visual storytelling.

8. Medicinal Tree Seedling Production Center and Kitchen Garden

The Department of Geography at Dinhata College has implemented a comprehensive **Medicinal Tree Seedling Production Center**, utilizing a 14 x 80 square feet rooftop garden. This initiative is designed to promote sustainable practices while providing students with hands-on learning opportunities. The center includes a **4x10 feet vermicomposting unit**, which supports organic farming efforts. This project is also integral to the department's **6-month internship program** focused on medicinal plant cultivation, composting, and sustainable gardening.

The rooftop kitchen garden in the Department of Geography at Dinhata College has successfully yielded a variety of vegetables, including Spong Gourd (Dhundul). This initiative promotes sustainability while providing students with practical learning in organic farming, contributing to both environmental conservation and academic enrichment.

Items	Photographs
<p>Medicinal Tree Seedling Production Center</p> <p>The production center focuses on the growth of medicinal plants such as Neem, Tulsi, Amla, Haritaki, Bahera and Arjune. These saplings are cultivated organically using</p>	

compost from the department's own vermicomposting unit. The production of 1000 saplings every year not only contributes to environmental conservation but also serves as a learning tool for students.

Vermicompost Centre

The **4x10 feet vermicomposting center** is a vital component of this initiative. Organic waste collected from the department and college is processed into compost, which is then used to nourish the medicinal plants and the kitchen garden. This composting system promotes resource recycling and reduces the environmental footprint of the department.

The rooftop kitchen garden in the Department of Geography at Dinhata College has successfully yielded a variety of vegetables, including Spong Gourd (Dhundul). This initiative promotes sustainability while providing students with practical learning in organic farming, contributing to both environmental

conservation and academic enrichment.

9. Career Counseling

The Department of Geography at Dinhata College organized career counseling sessions during the admission period to guide students in choosing appropriate career paths. These sessions provided insights into various opportunities in geography-related fields such as environmental management, GIS, urban planning, and research. Experienced faculty members and external experts interacted with the students, helping them understand the skills required for different careers and how to align their academic journey with future goals. The counseling sessions were instrumental in guiding students toward making informed decisions about their academic and professional aspirations, fostering a supportive environment for career development.

<p>Date- 29/05/2024</p> <p>Abhishek Barman, Assistant Professor of Geography at P.D. Women's College, conducted career counseling sessions at our department, benefiting 60 students. His expert guidance helped students explore various career opportunities in geography, providing valuable insights into aligning their academic pursuits with professional goals.</p>	

10. Special Lecture

The Department of Geography organized a special lecture featuring esteemed guests from various national universities and colleges, as well as social workers. This event highlighted the introduction of the Honors program in Geography, which was first implemented in 2018. The lecture provided a platform for sharing insights and advancements in the field of geography, emphasizing the program's impact on academic and professional development. The presence of distinguished guests enriched the discussion, fostering collaboration and exchange of knowledge among attendees. This initiative underlined the department's commitment to enhancing educational opportunities and engaging with broader academic and social communities.

Professor Ranjan Roy, Professor, Department of Geography and Applied Geography,, University of North Bengal delivered a special lecture titled "Why We Learn Geography" at the Department of Geography, Dinhata College. He emphasized the importance of geography in understanding global issues, environmental sustainability, and spatial relationships. The lecture inspired students to explore geography's role in solving real-world challenges and promoting global awareness.

Date- 29/11/2022

An interactive session was held with the Vice-Chancellor of Cooch Behar Panchanan Barma University (CBPBU) at Dinhata College, organized by the Department of Geography. The Vice-Chancellor engaged with students and faculty, discussing academic development, research opportunities, and the importance of interdisciplinary studies, encouraging active participation and future collaboration within the university.

Date- 25/11/2022

Professor A.P. Das delivered an insightful lecture on "Conservation and Sustainable Utilisation of Natural Plant Resources from Traditional Knowledge" at Dinhati College. He emphasized the role of indigenous practices in preserving biodiversity and promoting sustainable resource use. The event was graced by Patron Principal Abdul Awal, who supported this important initiative.

Date- 24/09/2022

A two-day special lecture on GIS was conducted by Sumana Saha, a Research Scholar from CBPBU, at the Department of Geography, Dinhata College. The session covered key GIS concepts, applications, and its relevance in geographical research. Students actively engaged with the content, gaining valuable insights into modern geospatial technologies.

Departmental Seminar

Webinar

Date- 22 to 24/ 01 / 2021

The Department of Geography, Dinahata College, organized a 3-day departmental webinar from February 22 to 24/01/ 2021. The webinar featured insightful lectures and discussions on various geographical topics, with experts and scholars participating. Students and faculty engaged in meaningful exchanges, enhancing their knowledge and understanding of contemporary geographical issues.

11. Weather Station

On November 20, 2023, a new weather station was established under the leadership of Gopinath Raha, IMD Regional Director. The setup marks a significant advancement in meteorological monitoring for the region. This weather station will enhance local weather forecasting capabilities and contribute to more accurate climate data collection. It aims to support both academic research and community awareness by providing real-time weather information. The initiative reflects a commitment to improving environmental management and fostering collaboration between meteorological services and educational institutions. The installation was

completed successfully, setting a strong foundation for future meteorological advancements in the area.

12. Cultural Activities-

The Geography Department of Dinhata College organizes several key annual events to foster community spirit and celebrate academic milestones. These include:

1. **Nabin Baron (Freshers' Welcome):** Held at the beginning of the academic year, this event warmly welcomes new students into the department. Faculty members and senior students introduce the freshers to the academic environment, followed by cultural performances and interactive sessions. It is a platform for the newcomers to engage with the department and start their journey on a positive note.
2. **Farewell Program:** The farewell program is organized to bid goodbye to the outgoing students. It's a heartwarming event where faculty and junior students appreciate the seniors' contributions and achievements. The event often includes speeches, sharing of memories, and cultural performances, celebrating the graduates' journey and wishing them success in their future endeavors.
3. **Teachers' Day Celebration:** Every year on September 5th, the department celebrates Teachers' Day to honor the contributions of educators. Students organize this event with gratitude and respect, offering heartfelt messages, performances, and gifts to their teachers. It is an occasion of bonding, reflection, and appreciation, enhancing the teacher-student relationship within the department.

13. Internship Course-

The Geography Department of Dinhata College, in collaboration with the NCCF curriculum under Cooch Behar Panchanan Barma University (CBPBU), will be introducing an Internship Course on Medicinal Plant Seedling starting in 2024. This course aims to provide practical knowledge and hands-on experience to students about medicinal plants, their importance, and methods of seedling production.

The internship will focus on:

- Understanding various medicinal plant species.
- Learning about seedling techniques, growth patterns, and environmental requirements.
- Promoting sustainable practices in medicinal plant cultivation.

students' overall development.

15. Add on Course

The course on the "Application of GIS in Geography" was conducted from September 18, 2023, to September 23, 2023, with a total of 118 students and 6 resource persons participating. The course aimed to provide participants with a comprehensive understanding of GIS technology and its applications in the field of geography.

Course Content:

The course covered a wide range of topics, including:

- Introduction to GIS and its components.
- Basics of spatial data and data sources.
- GIS data models and data structures.
- GIS data collection methods.
- Spatial analysis techniques.
- GIS applications in urban planning, environmental management, and natural resource assessment.
