

Programme & Course Outcomes.

- Students will acquire the knowledge and skills to apply meaningful thought in solving various mathematical problems and gain a deeper understanding of the fundamental structures of mathematics.
- Students will be encouraged to explore diverse applications of mathematics in different fields.
- Students will be enriched with modern perspectives on mathematics to meet contemporary needs.
- Retention of mathematical concepts among students will be enhanced through structured learning.
- Teachers will be equipped to demonstrate, explain, and reinforce abstract mathematical ideas using models, charts, graphs, pictures, posters, and various software tools through computers.
- A student-friendly approach will be fostered in the learning process of mathematics.
- The curriculum will promote the use of free and open-source software tools among both students and teachers.
- Infrastructure in each Mathematics department will be developed to help students explore mathematical concepts through activities and experimentation.
- The curriculum will be explored the free and open software tools amongst the students and teachers.
